**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 drawn to an electrical vehicle.
  - II. Claims 13-19, drawn to a power generating assembly.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions of Group I through II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different mode of operation, functions and effects.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Andrew G. Kolomayets (Reg. No. 33,723) on November 9, 2004 a provisional election was made without traverse to prosecute the invention of Group II, claims 13-19. Claims 1-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
5. This application is in condition for allowance except for the presence of claims 1-12 to invention non-elected without traverse. Accordingly, claims 1-12 have been cancelled.

**Examiner's Amendment**

6. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. §1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

7. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Andrew G. Kolomayets (Reg. No. 33,723) on November 9, 2004.

8. The application has been amended as follows:

Cancel claims 1-12.

Claim 13. (Amended) A power generating assembly in a vehicle comprising:

a generator for generating an electrical power;

a rotor assembly attached to said generator having a plurality of uniformly spaced cavities disposed about the center thereof and defining a plurality of raceways;

a plurality of mobile weights within said raceways, said weights adapted for movement within said cavities; wherein

said rotor assembly and said generator being held by a framework attached to the vehicle; wherein

said framework has first and second double-bearing assemblies.

***Reasons for Allowance***

9. Claims 13 -19 are allowed.

**10. Examiner's Statement of Reasons for Allowance:**

Applicant(s) invention relates to a power generating assembly, and more specifically, to structural features of the power generating assembly.

The system has a generator driven by a rotor assembly. The rotor assembly has a massive disk with slots along which plurality of weights can slide along when disk is rotated. A double-bearing assembly is provided for proper rotation capabilities.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant invention differs from the prior art of record by the configuration of the structural elements, which are performing as disclosed and claimed, and which examiner's search failed to find.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2834

**Conclusion**

12. The prior art made of record and not relied upon is considered pertinent to applicant(s) disclosure.
